

## Kerabit Butyl Strip

Päivitetty 25.6.2015 Tulostettu 28.5.2023

The mesh-reinforced Butyl Strip, adhesive on both sides, is used in the installation of hanging underlays in order to fasten them to the eaves flashing and to provide insulation between ventilation battens and the underlay.

This product can also be used to fasten and seal details in the roof structure.

### Technical data
