## Kerabit Green Roof Eaves Flashing HST

Päivitetty 21.12.2019 Tulostettu 21.11.2024

The green roof eaves flashing made of acid-resistant steel is ideal for use on green roof eaves. Acid-resistant steel is best suited to withstand any stress found in green roof systems. The flashings are two metres long.

### Technical data

<b>Country of origin</b>	Finland
<b>Production material</b>	acid-resistant steel
<b>Nominal thickness</b>	0,5 mm
<b>Dimensions</b>	length 2 m
<b>Nominal weight</b>	1,65 kg/pc
<b>Colours</b>	steel (HST)
<b>Weight / package</b>	16,5 kg

### Additional information

Fastening with c/c spacing of 100 mm in a zigzag pattern using screws with wide and flat heads.
