## Kerabit Green Roof Eaves Flashing HST

Päivitetty 21.12.2019 Tulostettu 6.12.2025

The green roof eaves flashing made of acid-resistant steel is ideal for use on green roof eaves. Acid-resistant steel is best suited to withstand any stress found in green roof systems. The flashings are two metres long.

## Technical data

Country of origin	Finland	
Production material	acid-resistant steel	
Nominal thickness	0,5 mm	
Dimensions	length 2 m	
Nominal weight	1,65 kg/pc	
Colours	steel (HST)	
Weight / package	16,5 kg	

## Additional information

Fastening with c/c spacing of 100 mm in a zigzag pattern using screws with wide and flat heads.
