

## Kerabit Damp-proof courses

Päivitetty 25.4.2023 Tulostettu 9.2.2026

Kerabit Damp-proof courses are intended to serve as capillary breaks between the footing and the foundation as well as between the foundation and walls. The strips are made of SBS-bitumen and they feature a sand or powder coating.

A wide range of sizes is available, with some products suitable for torching.

### Technical data

<b>Manufacturer / Manufactured for</b>	Kerabit Oy, Lohja plant
<b>Country of origin</b>	Finland

<b>Surface type</b>	sand or slate granule
<b>Rolls size</b>	0,1x10 m, 0,15x10 m, 0,20x10 m, 0,25x10 m, 0,33x8 m torch-on and 0,5x8 m torch-on

### Additional information

#### Application

Kerabit Damp-proof courses are intended to serve as capillary breaks between the footing and the foundation as well as between the foundation and walls.

#### Handling and storage

Modified bitumen membranes are stored on pallets in a dry and cool place in an upright position. The rolls must be protected with plastic hoods or tarps. When the temperature exceeds + 40 °C, the rollers must be stored in a location that is protected from sunlight.

### Checklist

Kerabit sealing adhesive for sealing seams and details.
