## Kerabit Katusaumo

Päivitetty 4.9.2025 Tulostettu 2.7.2026

Katusaumo is an elastic, hot-applied sealing compound containing rubber but no solvents or other substances hazardous to health.

### Technical data

<b>Manufacturer / Manufactured for</b>	Kerabit Oy, Lohja Plant
<b>Country of origin</b>	Finland
<b>Need for materials</b>	depending on target
<b>Packages / pallet</b>	49 pcs
<b>Weight / package</b>	22,5 kg
<b>Weight / pallet</b>	1127,5 kg

### Additional information

#### Applications

For sealing joints and cracks in asphalt and concrete, as well as for the joints between rails and their concrete foundation.

#### Instructions for use

Katusaumo sealing compound must be heated using a bitumen pot equipped with a thermometer, a thermostat and an automatic heat regulation system. The temperature must not exceed 210°C. Sealing and filling the cracks is best carried out using a bitumen pouring can made for spreading bitumen. It is important that the surfaces to be repaired are dry and dust-free. When sealing, adhesion is enhanced if the surfaces are heated or if the Kerabit modified bitumen solution is applied to them.

For more detailed instructions, consult the product description.
