Kerabit Eaves / Verge Flashing

Päivitetty 25.4.2023 Tulostettu 6.11.2026

Eaves are finished off with eaves flashings that direct water away from the structure. For lower eaves, Kerabit Eave Flashing is used. Depending on the structure the gable eaves are finished with

→ Kerabit Eaves flashing with ridge
→ Kerabit Verge flashing for triangular batten and facing board or
→ Kerabit Eaves flashing.

The flashings are made of galvanized and polyurethane-coated steel and the color options are grey RR 23 and black RR 33. The length of the flashing is two metres.

The corner pieces are no longer included in our product sortiment.
