

## Kerabit 1800 UB Fleece

Päivitetty 10.7.2024 Tulostettu 25.5.2026

Kerabit 1800 UB Fleece K-MS 150/1800 is a modified bitumen underlay membrane and an underlay membrane for discontinuous roofings.

The product is used as an underlay membrane for machine-seamed and other steel and tile roofings, for example.

The carrier consists of strong polyester. The top surface of the product is coated with a polypropylene fibre cloth and sand granules at the bottom surface. The 100 mm wide adhesive sections are located on the top and bottom surfaces, on opposing sides.

|---|---|
| <b>Manufacturer / Manufactured for</b>          | Kerabit Oy, Lohja plant   |
| <b>Country of origin</b>                        | Finland   |
| <b>Conformity marking</b>                       | CE mark   |
| <b>Reaction to fire</b>                         | Manufacturer's fire testing certificate                                     |
| <b>Fire Classification</b>                      | B <sub>ROOF</sub> (t2)  |
| <b>Manufacturer's declaration of conformity</b> | Kerabit modified bitumen roofing materials                                  |
| <b>Quality control</b>                          | Quality control agreement between the Plant and Eurofins Expert Services Oy |
| <b>Nominal thickness</b>                        | 1,7 mm  |
| <b>Nominal weight</b>                           | 1800 g/m <sup>2</sup>   |
| <b>Weight of the supportive layer</b>           | 150 g/m <sup>2</sup> (+/- 10 g/m <sup>2</sup> )                             |
| <b>Supportive layer</b>                         | polyester   |
| <b>Surface type</b>                             | PP fibre cloth on both top and bottom surface                               |
| <b>Rolls size</b>                               | 1 x 15 m / 15 m <sup>2</sup>  |
| <b>Packages / pallet</b>                        | 24 rolls  |
| <b>Weight / package</b>                         | 27 kg   |
| <b>Weight / pallet</b>                          | 673 kg  |

### Additional information

#### Applications

The product is used as an underlay membrane for discontinuous roofings on, for example, machine-seamed and other steel and tile roofings. The top surface with no sand does not scratch the zinc coating of the steel roofing.

## Handling and storage

Modified bitumen membranes are to be stored on pallets in a dry and cool place. Use a plastic hood or tarpaulin for protection. When the outdoor temperature exceeds +40°C, the rolls must be protected from sunlight.

Before installation, the rolls must be stored at a temperature of +15 °C, or warmer, for at least a day. The membrane rolls are unrolled in advance to straighten out, which prevents bumps in the product. The time that the straightening out requires depends on the temperature (approximately 1 to 4 hours).

## Checklist

As far as using of torch-on membrane is allowed, **Kerabit 3700 UT Fleece** is well suited for details of standing seam metal roof (e.g. upstands, valleys and chimneys), where Kerabit 2600 UB Fleece with self-adhesive edge is used as underlay.
